

Commands for Collecting Outputs on UCS C-Series as Standalone

What We Need

Output Specifications from your device to quote and onboard your spare.

Why This Matters

Learn what happens with the outputs retrieved and why we need the information from these commands at [PIVIT's Sparing Integrity Program](#).

Procedure

For C series as Standalone

Please use the below guide. Once each command or designated tool is run, return the output file received from the device to PivIT in a .txt format using the following secure link: <https://onecall.pivitglobal.com/file-upload/quote>

Output Commands

CIMC is the integrated management controller on Cisco servers (similar to Dell iDrac), therefore complete the following:

Connect to CIMC via SSH:

```
# show chassis detail
# scope chassis
# show cpu detail
# show dimm detail
# show psu detail
# show hdd detail
# show gpu
# show storageadapter detail
# show pci-adapter detail
```
